

EFFICIENT FIELD MOBILITY TAKES MORE THAN INTELLIGENT HARDWARE.

Elevate automated field mobility when you modernize SAP workflows with Liquid UI and Zebra Technologies.

To meet customer demands within established compliance parameters, today's oil and gas, water, and electric utilities are turning to superior automation that provide field teams with complete visibility and control anywhere they go. As a result, more teams are...

Modernizing foundational workflows with emerging tech such as smart metering

Deploying cloud sharing for easier data access and reporting

Strengthening digital interfaces to prevent security threats

Selecting versatile technologies to minimize deployment costs without compromising workflows

CMAC simplifies data processing with mobilized SAP through Liquid UI, resulting in:

- 40% more productivity via customized forms on a touchscreen interface
- 75% fewer data entry errors as you reduce manual data entry
- Maximized security and ease with pre-installed Android OS
- Faster deployment of upgraded SAP interfaces without middleware changes
- Unified onshore and offshore communication through one Android platform
- Customized forms to eliminate unnecessary fields
- Instant SAP mobility without disturbances
- Intelligent data capture and access for even the toughest barcodes
- Rugged ergonomics that prioritize worker efficiency and comfort
- Update and share reports in real-time
- Populate report fields without manual data entry
- Deploy software with no backend modifications

85% of utility teams
cite data access as one of
the core workflows of their
operations.

Take SAP mobility a step farther with Zebra's adaptable technologies.

Built to withstand tough environments, Zebra's purpose-built handhelds deliver real-time guidance to complete tasks faster and more accurately in the stringent challenges that often mark utility services.

Ultra-rugged handheld scanners

that equip your workers with faster and more accurate data capture to deliver the right products to the right customers.
